

Flag Printing Terms

“SS” = **Single Sided** - On 1 ply fabric - Front is printed and image may be seen on other side but generally less than 100% - depending on fabric used.

“SR” = **Single Reverse** - On 1 ply fabric - Front and back are printed - back in “reverse” / mirror.

“DS” or “DS3P” = **Double Sided** – Visual is visible correctly on both sides. Generally, 2 fabric prints mounted back to back with a light blocking liner (DS3P). DS is a new sandwich material where the 3 layers only make one smooth flat light blocking fabric printable on both sides.

Quality Fabric Used for Golf Flags:

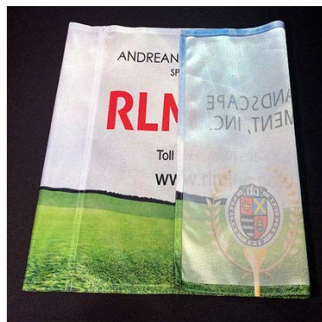

300D Polyester – Often mistaken for Nylon – Very durable - Nice tight knit mat finish which allows for high color and details. The 3P version will need more wind to fly and be visible.

Poly Flag – a Superior Brilliant 120 gram knitted flag fabric give life to colors in the sun and flies with lower winds.

Poly Sandwich – Two mat polyester layers with a black liner incrusted in the center making it one 9 oz. layers. Not as bright white as the 3P ply but does fly better and not as stiff.

400D Nylon – Colors are White, Royal Blue, Canada Red, FM Yellow, Orange. Other colors and custom design available. Supplied blank or with numbers or custom marking upon request.

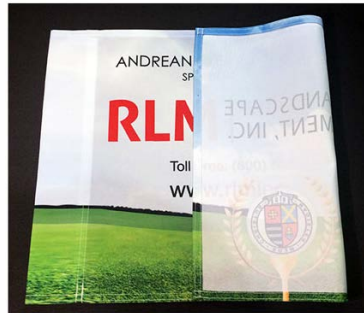

POLY FLAG - SS - Single Sided Print. Luster look and flies well.

POLY FLAG - SR - Single Reverse Print. Back is 100% printed in reverse.

300D - SS - Single Sided Print.

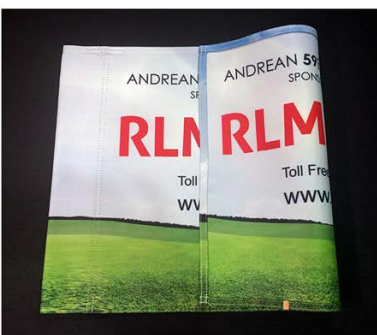

300D - SR - Single Reverse Print. Back is 100% printed in reverse.

300D - DS3P - Double Sided 3 Ply Print. 2 Prints back to back with liner.

POLY SANDWICH - DS - Double Sided Print.

NYLON - Multiple Colors / Printing on request
